

Semester Project – Topic Selection

Name of the Website:

Dela-where? Things to Do While in Delaware

Website Description:

Delaware, the first state, is located along the east cost of the USA and ranks as the second smallest state. This leads many people to ask: where is Delaware, what is there to do in Delaware, or even *What* is Delaware? Not many people have been to Delaware and even those that live in or near the state don't really know what to do there for fun. Although the state is small, there are tons of hidden gems, pieces of history, and fun things to do in and around it, which is what my website is designed to explore. My website will describe Delaware's interesting history, things to do while in the state, hidden gems that need to be uncovered, the best restaurants/experiences to enjoy, and simply why Delaware is a wonderful place to find oneself in. As we explore all these things, I will provide insider tips and guides as someone who has spent 16 years living and growing up in Delaware. Whether you are a Delawarean or just visiting, there is bound to be something new to learn and uncover about the first state.

Page Names:

1. Home
2. Discover Delaware
3. Activities & Attractions
4. Pictures
5. About Me

Data

I am going to be storing data on different locations to visit in Delaware including the:

- Names of Locations
- Addresses of Locations
- Phone Numbers (if applicable)
- Email addresses (if applicable)
- Hours of operation
- Google Review Ranking (if applicable)

This data won't be constant (data will be edited, removed, or added), so the website administrator must be able to alter this data at any time while visitors should not be able to edit it. This means different permission will be given to different users requiring accounts for those with elevate permission levels (edit, add, remove, etc.) These accounts will require their own secure login/authentication systems.
